Redmine - Feature #39880

Add a small border-radius to selected (author) headings

Description

Now that border-radius is already sparsely used in the Redmine core, there are three additional places that I've come across where a small border-radius (3px?) would be nice to have:

- selected issue journals
    - CSS selector:CSS selector:

    ```
    #history div:target h4.note-header
    ```

- selected forum topic replies (i.e. messages)
    - CSS selector:CSS selector:

    ```
    #replies .reply:target h4.reply-header
    ```

- selected wiki page headings
    - CSS selector:CSS selector:

    ```
    div.wiki a:target + h1, div.wiki a:target + h2, div.wiki a:target + h3, div.wiki a:target
    + h4, div.wiki a:target + h5, div.wiki a:target + h6
    ```

There actually is a fourth place, but that one (the progress bars) needs, IMHO, more work first and in addition to it, so I'll leave it out of this issue to keep this small and easy.
