Description			
<p>PDF files should be generated properly in all supported languages out of the box. There is a big problem with nonenglish characters in PDF files.</p> <p>For now nonenglish users have to download tpdf.rb and utf-8 fonts to make use of generated pdf's. I think it is unacceptable for such good project like Redmine.</p> <p>It would be great to see tpdf.rb and FreeSans font in next Redmine release.</p> <p>Regards Krzysztof Podejma</p>
