

Redmine - Defect #40355

Due dates, The users should not change them.

2024-03-07 08:19 - Gco IT

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	3.4.6
Resolution:			
Description			
How to achieve this, after inputting the due date, the user should not change it. Only the department leader has the ability to update it.			

History

#1 - 2024-03-07 12:11 - Holger Just

- Category changed from Database to Issues
- Status changed from New to Closed

This is not a defect but a usage question. Please use the forums for that.

To answer your question, you can configure which users (or rather roles) can edit which fields in Administration -> Workflows -> Fields permissions. Here, you can deny some roles the ability to change the due date for issues in some trackers and statuses. Note that a user can edit a field if they have at least one role in the project which allows them to edit the field on an issue on the respective tracker and with the respective status.
