

Redmine - Defect #40413

The issue list filter "Watched by" only dereferences "watched by group" for "me" value

Category:	Issues list	Estimated time:	0.00 hour
Target version:		Affected version:	5.1.2
Resolution:			

Description

When using the << me >> value for the "Watched by" filter on the issue list, group memberships will be dereferenced and issues the user watches via groups will be show in the results (if the user has view_issue_watchers permission, see [#40412](#)).

Group memberships however will not be considered for this filter when using named users for the value of the filter. Groups memberships should also be applied for named users.

Note: This also means that using this filter with << me >> will produce different results for a user than when the user selects herself In the list.
