

Redmine - Feature #4050

Ruby 1.9 support

2009-10-18 12:51 - Alexey Froloff

Status:	Closed	Start date:	2009-10-18
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Ruby support	Estimated time:	0.00 hour
Target version:	1.4.0		
Resolution:	Fixed		
Description			
<p>With attached patches redmine passes all tests with Rails 2.3.4 and Ruby 1.9.1. I'm trying to package redmine for ALT Linux distro, these patches are not distribution specific.</p> <p>I have packaged and installed following modules (never tried to patch vendored versions):</p> <p>ruby-coderay (http://svn.rubychan.de/coderay) rails-plugin-engines (http://github.com/lazyatom/engines) rails-plugin-rfpdf (http://github.com/edwinmoss/rfpdf)</p> <p>Excerpt from redmine spec just for reference:</p> <pre>rm -rf vendor/plugins/coderay*/ rm -rf vendor/plugins/engines/ rm -rf vendor/plugins/rfpdf/ # these locales fail test_load(DefaultDataTest) rm -f config/locales/hu.yml rm -f config/locales/zh.yml rm -f config/locales/zh-TW.yml cat <<EOF >config/database.yml production: adapter: sqlite3 database: db/production.db development: adapter: sqlite3 database: db/development.db test: adapter: sqlite3 database: db/test.db EOF rake --trace config/initializers/session_store.rb rake --trace db:migrate rake --trace test:scm:setup:create_dir rake --trace test:scm:setup:filesystem rake --trace test:scm:setup:git rake --trace test:scm:setup:subversion rake --trace test:units rake --trace test:functionals rake --trace test:integration</pre>

Associated revisions

Revision 4359 - 2010-11-02 01:20 - Jean-Baptiste Barth

Use File#expand_path for require's in script/* for Ruby 1.9.2 compatibility. #4050

Since Ruby 1.9.2, LOAD_PATH does not include "." directory anymore, so we should use absolute paths instead to ensure both 1.8.x and 1.9.x compatibility. It has been included in railties 2.3.x branch since july 2009, see <http://github.com/rails/rails/commit/7a427a83ca4da92c70760007aaf313638a5d8374>

Revision 4509 - 2010-12-13 00:24 - Jean-Baptiste Barth

Use absolute paths in test/**/* requires for Ruby 1.9.2 compatibility. #4050

Revision 4510 - 2010-12-13 00:24 - Jean-Baptiste Barth

Set encoding to utf-8 for ruby 1.9 compatibility. #4050

Revision 5000 - 2011-03-04 12:07 - Toshi MARUYAMA

scm: mercurial: add path encoding tests in functional test (#2664, #4050).

TODO: This test fails in Ruby 1.9 and Encoding.default_external is not UTF-8.

Revision 6461 - 2011-08-19 11:41 - Toshi MARUYAMA

Ruby 1.9: set Encoding.default_external = 'UTF-8' (#4050).

Without this setting, Redmine cannot boot on Japanese Windows nor on non UTF-8 locale Linux (e.g. LANG=en_US.ISO-8859-1).

Revision 6462 - 2011-08-19 12:18 - Toshi MARUYAMA

Ruby 1.9: force use syck yaml library (#8847, #4050).

Revision 6647 - 2011-08-27 02:11 - Toshi MARUYAMA

Ruby 1.9: add rake task to check parsing yaml by psych library (#8847, #4050).

Original code is written by Etienne Massip.

Revision 6649 - 2011-08-27 02:18 - Toshi MARUYAMA

Ruby 1.9: fix typo of rake task name to check parsing yaml by psych library (#8847, #4050).

Revision 7927 - 2011-11-26 00:15 - Toshi MARUYAMA

Ruby 1.9: fix encoding error on wiki diffs (#4050)

WikiDiff#to_html returns a string with ASCII encoding if the WikiJournal content has been Zlib compressed because Zlib::Inflate.inflate returns strings with ASCII encoding. Forcing the encoding to be UTF8 fixes this bug.

Contributed by Moritz Breit.

Revision 7928 - 2011-11-26 02:39 - Toshi MARUYAMA

Ruby 1.9: fix TabularFormBuilder to show "translation missing: en, field_lock_version" (#6853, #4050)

Contributed by Moritz Breit.

Revision 8713 - 2012-01-28 05:57 - Toshi MARUYAMA

Ruby1.9: set Encoding.default_external on only Rails2 (#4050, #4796)

Revision 8714 - 2012-01-28 05:58 - Toshi MARUYAMA

Ruby1.9: enforce UTF-8 encodings on the params hash on Rails2 (#4050, #4796)

Without this change, non ASCII subject issue cannot be created on Ruby 1.9.

Revision 8716 - 2012-01-28 11:26 - Toshi MARUYAMA

Ruby1.9: skip enforcing UTF-8 encodings on the params hash on Rails2 if it is frozen (#4050, #4796)

Tests on CI server fail.

http://www.redmine.org/builds/build_trunk-1.9.2-sqlite3_257.html

```

Revision 8833 - 2012-02-10 14:08 - Toshi MARUYAMA

Ruby1.9: move setting Encoding.default_external after boot (#4050, #4796)

"ruby test/functional/repositories_git_controller_test.rb" fails
on Japanese Windows and Mingw Ruby 1.9.3p0
because "Rails" is not defined.

History

#1 - 2009-10-18 12:52 - Alexey Froloff

- File 0011-Process-fixtures-as-binary.patch added

#2 - 2009-10-18 12:53 - Alexey Froloff

Forgot to mention. All patches made against yesterday's trunk.

#3 - 2010-07-19 22:37 - Holger Just

- Category set to Ruby support

#4 - 2010-08-25 14:33 - Etienne Massip

That would be great as ruby 1.9.2 is out now and is meant to be the first 1.9 release ready for production use.

This could improve greatly the speed and usability of Redmine.

#5 - 2010-08-25 14:41 - Alexey Froloff

```
$ git diff --stat tags/1.0.0..master -- app/ config/ lib/ test/ vendor/ | tail -4
60 files changed, 264 insertions(+), 220 deletions(-)
```

Works perfect with 1.9.1p376. Since there's no reaction on my patches, I don't see any reason for me to submit anything again.

#6 - 2010-08-25 16:02 - Jean-Baptiste Barth

Alexey, please don't take it that way, be sure that such contributions are **very** appreciated.

There were no reaction to your patch for various reasons. Mainly because we are very few contributors around to review thousands of pending issues. Plus, if I remember correctly, 1.9.1 has always been said to be not really ready for production (I remember articles about weird cases, segfaults, etc.).

But now with 1.9.2 released, the situation is very different. I'd personally like 1.1 to be fully compatible with ruby 1.9, and maybe we'll begin to support more recent rails versions.

I'll have a look at your patches and integrate them one by one as soon as I come back from my holidays in september. Thank you again.

#7 - 2010-08-25 16:43 - Alexey Froloff

This issue is already obsolete. In <http://git.altlinux.org/people/raorn/packages/?p=redmine.git> I have working redmine 1.0.0 (upstream sources were imported with git-svn) with bunch of fixes related to 1.9.1 incompatibilities, encoding issues, rails 2.3.8 anti-XSS false-positive escapes as well as several really nasty bugs.

I am packaging redmine for ALT Linux distro, we have ruby 1.9.1 as the only ruby version in repository. I am doing this just for fun, although there are several users who runs this version in their "production".

I can comment on any my commit, but submitting issues without any feedback in months don't worth the effort. Nothing personal.

#8 - 2010-08-25 16:53 - Etienne Massip

This issue can't be obsolete, you just brought a considerable help to Redmine's development for which we, users, are very thankful.

BTW, it looks like someone else did the same to get early Rails 3 support (issue [#4796](#)) : <http://github.com/jeremy/redmine>

#9 - 2010-08-25 21:01 - Jean-Baptiste Barth

OK thanks, I mirrored this repo on my laptop so that I can hack a bit on it.

#10 - 2010-09-12 02:54 - David Morton

I'm very interested in this too, as I just spent a week or two getting an application ready for rails 3, and then I discovered that passenger needs to run the same ruby version for all apps on the server - and so to run redmine on the testing server along with the application, I need both to run in 1.9.2. :(

Alexsey: you said 1.0.0, how is it tracking with 1.0.1 ?

#11 - 2011-03-04 06:24 - Toshi MARUYAMA

- File Ruby-1.9-Encoding.default_external.diff added

After Redmine updated Rails 2.3.11, I can't run on my Japanese Windows nor Linux Latin-1 locale on Ruby 1.9.

```
$ ruby --version
ruby 1.9.2p136 (2010-12-25 revision 30365) [x86_64-linux]
```

```
$ locale
LANG=en_US.ISO-8859-1
LC_CTYPE="en_US.ISO-8859-1"
LC_NUMERIC="en_US.ISO-8859-1"
LC_TIME="en_US.ISO-8859-1"
LC_COLLATE="en_US.ISO-8859-1"
LC_MONETARY="en_US.ISO-8859-1"
```

```
LC_MESSAGES="en_US.ISO-8859-1"
LC_PAPER="en_US.ISO-8859-1"
LC_NAME="en_US.ISO-8859-1"
LC_ADDRESS="en_US.ISO-8859-1"
LC_TELEPHONE="en_US.ISO-8859-1"
LC_MEASUREMENT="en_US.ISO-8859-1"
LC_IDENTIFICATION="en_US.ISO-8859-1"
LC_ALL=
```

ActionView::TemplateError (incompatible character encodings: UTF-8 and ISO-8859-1) on line #62 of app/views/layouts/base.rhtml:

```
59:
60:     <div id="content">
61:         <%= render_flash_messages %>
62:         <%= yield %>
63:         <%= call_hook :view_layouts_base_content %>
64:         <div style="clear:both;"></div>
65:     </div>
```

```
app/views/layouts/base.rhtml:62:in `concat'
app/views/layouts/base.rhtml:62:in `_run_rhtml_app47views47layouts47base46rhtml'
<internal:prelude>:10:in `synchronize'
/home/xxxxx/.rvm/rubies/ruby-1.9.2-p136/lib/ruby/1.9.1/webrick/httpserver.rb:111:in `service'
/home/xxxxx/.rvm/rubies/ruby-1.9.2-p136/lib/ruby/1.9.1/webrick/httpserver.rb:70:in `run'
/home/xxxxx/.rvm/rubies/ruby-1.9.2-p136/lib/ruby/1.9.1/webrick/server.rb:183:in `block in start_thread'
```

```
Rendered rescues/_trace (228.3ms)
Rendered rescues/_request_and_response (2.0ms)
Rendering rescues/layout (internal_server_error)
```

I apply this patch, then I can run Redmine.

#12 - 2011-04-22 14:33 - Etienne Massip

- Target version set to Candidate for next major release

#13 - 2011-04-28 13:59 - Toshi MARUYAMA

- File application_controller.diff added

This is additional patch.

Without this patch, I can not input non ASCII characters.

#14 - 2011-06-14 04:41 - Toshi MARUYAMA

- Tracker changed from Patch to Feature

#15 - 2011-08-24 23:51 - Toshi MARUYAMA

FYI:

- <https://www.chiliproject.org/issues/591>

#16 - 2011-10-30 12:46 - Toshi MARUYAMA

- File application_controller_chili_21a45b4e.diff added

This is an updating note-13 patch from <https://www.chiliproject.org/issues/676>

#17 - 2011-12-10 21:19 - Etienne Massip

- Target version changed from Candidate for next major release to 1.4.0

#18 - 2012-01-28 12:15 - Jean-Philippe Lang

[r8714](#) breaks tests with ruby 1.9. I'd really like that this fix comes with a test so that we can safely remove it in the future.

#19 - 2012-02-01 16:22 - Toshi MARUYAMA

Japanese attachment filename is broken on Japanese Windows Ruby 1.9

<https://www.chiliproject.org/issues/856>

#20 - 2012-03-11 09:56 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Fixed

I'm closing it as the test suite passes with both 1.9.2 and 1.9.3 (1.9.1 is not supported by Rails):
<http://www.redmine.org/builds/index.html>

Separate issues should be open if incompatibilities are found.

#21 - 2012-04-03 14:32 - Alexander Oryol

Please, add to related issue [#10593](#)
