Description

Dear developes, hope it can be possible to make a small plugin to help people who have many custom fields in their installation, dividing the custom fields administration page in many pages and showing only 100 or 200 fields per page. We are having the problem explained in this ticket:(https://www.redmine.org/boards/2/topics/69686) because we have a 2200 custom fields, and it would be very helpfull to have a plugin that allows to navigate between them in efficient way.
Thanks a lot.
