

Redmine - Defect #40720

(default) Columns set in settings do not show up when viewing issues

2024-05-24 00:50 - James H

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues list	Estimated time:	0.00 hour
Target version:		Affected version:	5.1.2
Resolution:			
Description			
The default columns set in the settings page are not being applied to the issues lists. Only the #, Project, Tracker, Status, and Subject show up. None of the other columns I have added show up in the issues until I manually add them.			

History

#1 - 2024-05-24 03:21 - Go MAEDA

Perhaps you are using the default query feature ([#7360](#)) that allows you to apply a custom query to the issues list by default. If so, the list will show the columns selected in the custom query.

#2 - 2024-05-24 04:27 - James H

default query: none
have not touched that setting. Should I try unsetting and setting again?

#3 - 2024-05-24 06:00 - James H

hopefully by tomorrow I'll have a new instance spun up and ready so I can test a bare bones version to verify.

#4 - 2024-06-07 08:42 - James H

I did not receive a fresh instance to test a bare bones redmine yet...
But I think the problem resolved itself over time.... my guess is probably when users use specific parts of the app 1-2 times, it eventually probably sets or uses the correct issue custom query: none.

It probably is still a problem but seems to be not super critical...
Once I get a chance to test on a bare bones instance I will try to update, sorry!
