

Redmine - Feature #40726

Disable jumping to journal's note after updating the issue

Target version:			
Resolution:	No feedback		

Description

Current functionality automatically scrolls the page to new note, after issue is updated. It is not handy if you are updating some issues's fields, submit it and want to continue working with issues further — you have to scroll page back to the top after each update.

Is it possible to turn jumping to new note's anchor link in Redmine 5.1.1?

History

#1 - 2024-05-27 09:02 - Go MAEDA

I could not confirm such behavior. When you update an issue, Redmine redirects to `/issues/#{id}`, so the browser shows the top of the issue page, not the latest note.

Maybe some plugin you are using causes the behavior.
