

Redmine - Defect #40928

Unexpected checkbox behavior in project tree when configuring groups

2024-07-03 11:32 - Liane Hampe

Status:	Confirmed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Groups	Estimated time:	0.00 hour
Target version:			
Resolution:		Affected version:	5.1.3

Description

Having some projects with subprojects created like those from tests

✔ Apply ↺ Clear 📁 Save custom query

<p>eCookbook </p> <p>Recipes management application</p> <p>Private child of eCookbook  </p> <p>This is a private subproject of a public project</p> <p>Child of private child</p> <p>This is a public subproject of a private project</p> <p>eCookbook Subproject 1</p> <p>eCookBook Subproject 1</p> <p>eCookbook Subproject 2</p> <p>eCookbook Subproject 2</p>	<p>OnlineStore</p> <p>E-commerce web site</p>
---	--

will show up in the group settings with checkboxes as a tree (at least when looking at the html code):

Add projects

✓ Projects

☐ eCookbook

☐ Child of private child

☐ eCookbook Subproject 2

☐ Private child of eCookbook

☐ eCookbook Subproject 1

☐ OnlineStore

✓ Roles

☐ Manager

☐ Developer

☐ Reporter

Add

Cancel

The unexpected behavior has two different occurrences.

1) Checking and unchecking a subproject causes it to be unchecked when double checking the parent project.

2) Doing the same as in 1) and try to uncheck the parent project will keep it locked until all subprojects are checked.

Note: RM version 5.0.9 is also affected.

History
