

## Redmine - Defect #40969

### Cannot edit priority field in edit screen

2024-07-11 23:00 - Paul Philion

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Issues permissions	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	5.1.3
<b>Resolution:</b>	Invalid		
<b>Description</b>			
After create a new issue, I can see the priority on the issue screen.			
When I click the edit button, I don't see any way to change the Priority field. That field doesn't even appear in the edit panel. Further, I cannot set Priority on main issue list item menu.			
Experimenting seems to indicate that the problem is related to sub-tasks. When an issue has sub-issues, you cannot edit the priority. Delete the sub-issues, the priority field appears on the edit panel.			
The logged in user is an admin with all permissions checked under "Roles & Permissions"			

#### History

##### #1 - 2024-07-12 06:28 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

By default, the start date, due date, priority, and done ratio of a parent issue are automatically calculated based on the values of its subtasks. Therefore, the inability to edit these fields directly in the parent issue is not a defect, but the intended behavior of Redmine.

If you wish to have the ability to edit these fields in a parent issue, you can change this setting by navigating to Administration > Settings > Issue tracking tab and adjusting the "Parent tasks attributes" configuration.
