

Redmine - Defect #41101

Text format custom field is displayed with the full-width layout in the Issue edit screen

2024-08-07 12:20 - Katsuya HIDAHA

Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			

**Description**

A text format custom field with the full-width layout will be created using the following steps. In addition, after creation the full-width layout of the custom field can't be disabled.

1. Create a long text format custom field with the full-width layout

2. Copy the custom field created in step1 and change the format type to text format, then save it

The custom field created with the above steps is displayed as follows in the Issue edit screen:

image1.png

The expected result should be as follows:

image2.png

This issue seems to occur because the value of the format\_store column of the original custom field is copied to the coping custom field as-is.

[https://github.com/redmine/redmine/blob/2bc9048bb1db4f7bbc872fb1a4a1ce922ad5173e/app/models/custom\\_field.rb#L111](https://github.com/redmine/redmine/blob/2bc9048bb1db4f7bbc872fb1a4a1ce922ad5173e/app/models/custom_field.rb#L111)

```
def copy_from(arg, options={})
  return if arg.blank?

  custom_field = arg.is_a?(CustomField) ? arg : CustomField.find_by(id: arg.to_s)
  self.attributes = custom_field.attributes.dup.except('id', 'name', 'position')
```

I confirmed this problem occurs in Redmine v5.1 and trunk.

History

#1 - 2024-12-03 09:36 - Go MAEDA

A simple and user-friendly solution might be to add the full-width option to custom fields with Text format.

Go MAEDA wrote in [#note-1](#):

A simple and user-friendly solution might be to add the full-width option to custom fields with Text format.

That might be true, but it wouldn't actually fix the underlying defect that is also mentioned by [Katsuya HIDAHA](#):

This issue seems to occur because the value of the format\_store column of the original custom field is copied to the coping custom field as-is.
