Redmine - Patch #4113

Directory listing with CVS v1.11 patch

2009-10-26 13:16 - alexander smishlajev

Status:	Closed		**Start date:**	2009-10-26
Priority:	Normal		**Due date:**

Target version:				

Description

Directory listing with CVS SCM uses **rls** command which was not available in CVS versons prior to 1.12.

Could the CVS adapter use **cvs -q -n rlog -R** to get the repository contents listing?

History

#1 - 2009-10-26 16:50 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

Closing this defect since RedmineRepositories clearly states that cvs 1.12 is required.
Feel free to submit a patch.

#2 - 2009-10-27 11:09 - alexander smishlajev

- File cvs_adapter.rb.patch added

- Status changed from Closed to Reopened

Well, but the "stable" CVS version still is 1.11, and 1.11 is shipped with the latest production releases of FreeBSD.

The patch is attached.

I admit that the variant requiring CVS version 1.12 is much more effective. Perhaps Redmine could check the cvs version and then choose which code to run?

#3 - 2009-10-27 11:53 - Jean-Philippe Lang

- Tracker changed from Defect to Patch

#4 - 2009-10-27 11:54 - Jean-Philippe Lang

- Subject changed from Repository browsing fails with CVS v1.11 to Directory listing with CVS v1.11 patch

- Category set to SCM

- Status changed from Reopened to New

#5 - 2010-08-10 22:01 - Gareth Sylvester-Bradley

FWIW, I've now been using this patch successfully for several months to enable repository browsing for our CVS 1.11 server. Thanks!

This week I just needed to tweak the regular expression that parses the revision info very slightly to play nice with patch [#6090](#6090) to make downloading binary files from a CVS repository work when running Redmine on Windows.

Change line 65 from:

```
        re_loginfo = "revision ([0-9.]+)\s*\n"
```

to:

```
        re_loginfo = "revision ([0-9.]+)\s*\r?\n"
```

#6 - 2022-01-10 02:33 - Go MAEDA

- Status changed from New to Closed

Closing this issue because CVS 1.11 is too old.
