Target version:			

Description

In r22977, placeholders were set for the estimated hours and spent time fields, but the width of the estimated hours field is too narrow, so the placeholders are only visible halfway through.
  screenshot 2024-09-09 15.54.58.png
I propose increasing the size of the estimated hours field from 3 to 6 to align it with the spent time field.
