Target version:				
Resolution:	Fixed		**Affected version:**	

Description

Currently, plugins can add new items to the Admin menu, but setting custom icons for these items is not possible.
In this issue, I suggest enabling plugins to use custom SVG icons for each item added to the Admin menu.
This change would help make the interface more visually consistent and clear.
A patch is included with this issue

Nice, thanks!

One mention, plugins won't be able to set an icon from a sprite that has a different name than the default one (icons.svg).
