

Redmine - Feature #4175

Allow administrators to "freeze" a revision on the roadmap

2009-11-05 22:18 - Todd Nine

| Description Currently we keep all our revisions on our roadmap for auditing purposes. We have several non technical users that submit feature requests via Redmine, and have a large list of versions in our roadmap. Even though many of these versions have been long since released, they still appear as an option when filing a new issue. This causes a mangment nightmare. It would be nice if we could "freeze" a version and not allow users to assign any more issues to it. This would also be useful for stopping new features added on to a version shortly before it's release. Thanks, Todd | |

- Status changed from New to Closed
- Resolution set to Duplicate

This is a duplicate of [#1245](#). Could you look over that issue and provide any feedback you have on the proposed solutions (note 17)?
