History

#1 - 2024-12-05 16:42 - Raven None

I tried to do the same thing for two redmine instances this week and ran into the same error. It seems like when using the official Docker image, the update from 5.1.x to 6.0.1 is broken.

#2 - 2024-12-09 01:48 - Leonardo Colman

I don't even think it's a migration issue (ie update from 5.1 to 6.0), it seems 6.x docker image is broken altogether

#3 - 2024-12-11 20:19 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Invalid

I'm sorry, but we do not offer support for the Docker image, please contact the maintainers. If the problem is caused by Redmine core, please reopen with more details.
