<b>Resolution:</b>	Fixed		
<b>Description</b>			
Hi,			
I recognized that when I am changing the status of an issue using the context menu, the page that I am currently on (e.g. 3) changes and I am pushed back to the first page. This is very annoying. It would be better to reload the list (AJAX-style) and display the last viewed page. So one can to see if the status has been changed correctly and is able to correct it if necessary or proceed work with other issues on that page.			

#### Associated revisions
