Redmine - Defect #42066

NoMethodError exception occurs in IssuePriority#high and #low when both default and active priorities are absent

2025-01-03 08:35 - Go MAEDA

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:	5.1.6			
Resolution:	Fixed		**Affected version:**	

Description

A NoMethodError exception occurs when there is no default issue priority and all issue priorities are inactive, and IssuePriority#high or IssuePriority#low is called. his issue affects the process of generating the email notification recipients in Issue#notified_users. Consequently, the error can lead to an Internal Server Error being displayed in the user's web browser during issue updates.

The attached patch updates IssuePriority#high and IssuePriority#low to return false when self.class.default_or_middle is nil, avoiding exceptions.
