Redmine - Defect #42096

ÅÄÖåäö in API body don't work

2025-01-13 21:51 - Jimmy Westberg

Status:	New		Start date:	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	REST API		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	6.0.1

Description

As stated, it's okay if I need to make them URI encoded but the error message isn't very informative about the error, only giving me a 400

History

#1 - 2025-02-14 19:04 - Holger Just

The API generally expects correctly encoded data depending on the format in which you send the data:

- text/xml or application/xml - You can specify the encoding in the XML document if required. The default is UTF-8.
- application/json - JSON documents MUST always be UTF-8 encoded
- application/x-www-form-urlencoded - We generally expect UTF-8 encoded data here.

#2 - 2025-02-14 21:00 - Jimmy Westberg

Aha that's good to know. But the issue is more about the API not giving any information about this isn't very clear when reading the error code.
