Category:	Permissions and roles	Estimated time:	0.00 hour
Target version:		Affected version:	5.0.10
Resolution:	Duplicate		
Description			
If new user is not attached to any project, he can see all users via URL simply typing numbers after /users/{number} for example: https://redmine.org/users/50 In order to prevent this, user must be attached to some project with some role, otherwise, he can see list of all users.

History

#1 - 2025-01-14 18:30 - Holger Just

- Is duplicate of Feature #38853: Changes user visibility from "all" to "member of visible projects" for new roles and existing builtin roles added

#2 - 2025-01-14 18:31 - Holger Just

- Status changed from New to Closed

- Resolution set to Duplicate

You can set the user visibility for non-member users as well as Anonymous by editing the respective roles in **Administration -> Roles and permissions**.

The setting for both roles as well as the default setting for new roles will be updated to "member of visible projects" in Redmine 6.0. See [#38853](#). On older versions, you can edit this manually as described above.
