Target version:				
Resolution:			**Affected version:**	6.0.2

Description

Hello,
i've checked this new change:
https://www.redmine.org/projects/redmine/wiki/Themes

and i'm trying to make it work under nginx, but no luck... This new themes directory like invisible.
all files giving 404.
i also copied themes where default one stored, but it also doesn't help.

my current nginx config:

```
server {
    server_name server;
    listen 443 ssl ;
    root /home/redmine/redmine/public;
    ssl_certificate fullchain.cer;
    ssl_certificate_key key.pem;
    client_max_body_size 100m;
    location / {
      try_files $uri/index.html $uri.html $uri @ruby;
    }
  location @ruby {
    proxy_set_header Host $http_host;
    proxy_set_header X-Forwarded-Proto $scheme;
    proxy_set_header X-Real-IP  $remote_addr;
    proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
    proxy_redirect off;
    proxy_read_timeout 300;
    proxy_pass http://puma_redmine;
    }
  }
```

Does running the rake assets:precompile command make any difference?

interesting...

```
redmine@devcenter:~/redmine$ bundle exec rake assets:precompile
rake aborted!
Gem::LoadError: listen is not part of the bundle. Add it to your Gemfile. (Gem::LoadError)

Tasks: TOP => assets:precompile => environment
(See full trace by running task with --trace)
```

installed gem,
and `redmine@devcenter:~/redmine$ bundle exec rake assets:precompile RAILS_ENV=production` gave 0 output.

as a result didn't helped.

#3 - 2025-01-17 18:49 - Yar n

it worked!!

i forgot that i did some more plays with nginx, now it work with config in the topic.

Thanks, 🔲🔲 🔲 ISHIKAWA!

#4 - 2025-01-17 18:50 - Yar n

hm... Mizuki ISHIKAWA, thank you!

- Status changed from New to Closed

This seems to be fixed. Thus, I'm closing this issue.
