Target version:	6.1.0			
Resolution:	Fixed			

Description

This patch, authored by Katsuya HIDAKA ([Katsuya HIDAKA](#)), was extracted from [#42084](#).

In [#42084](#), two patches were proposed: one by Mizuki ISHIKAWA ([Mizuki ISHIKAWA](#)) (committed as [r23452](#)) and another by Katsuya HIDAKA. Since the fix needed to be backported to the 6.0-stable branch, I decided to commit Mizuki ISHIKAWA's patch, which involved minimal changes to the DOM.

On the other hand, Katsuya HIDAKA's patch includes the following improvements:

- The title attribute of the img tag, which was the root cause of the issue, is removed while preserving the tooltip position improvements introduced in [#41272](#).
- The img tag no longer has both alt and title attributes with identical values, improving accessibility.
- A class attribute is added to the div tag wrapping the img tag, making styling easier.

To incorporate these enhancements as a refactoring for the next major release, Redmine 6.1, I have opened this new issue.
