Description

While looking at r23548, I noticed a typo (basically the same as #36149) in the name of the Javascript function toggleExpendCollapseIcon (source:/trunk/app/assets/javascripts/application.js@23548#L45); it should read toggleExpandCollapseIcon.

I'm not sure if it's worth renaming the function, or if we should add the correct one and deprecate this one.
