Category:	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
<p>In the REPORTS, it would be nice to easily see "Estimated/Projected" hours assigned to a Particular User. (maybe per project and over 'all projects')</p> <p>Also, easy list of projected/estimated work hours left on a PROJECT ...</p> <p>Basically, you want to be able to look at REPORTS and see, hmmm we've estimated this project still has 60 hours of worktime needed and 50% of that is supposed to be done by JOE and the Due date is in THREE Days! We need to reshuffle/reassign work to other users so we can get the project done, or maybe extend due date on some issues/features in the project etc.....sorry if this is somehow doable and I missed it, I'm quite new, still trying to figure out why i don't have a gantt link on the left like on your own demo installation...thnx</p> <p>Dan</p>

+2, This funcionality would let you control the estimated time for each team member.

And the same thing in the plug-in TimeSheet, it would be interesting.
