Redmine - Feature #432

Custom Email templates, system wide and per project, through web interface.

2007-09-11 17:53 - Nick Gorbikoff

Priority: Normal Due date: Assignee: % Done: 0% Category: Email notifications Estimated time: 0.00 hour Target version: Resolution: 0.00 hour 0.00 hour Description This is something we caross. Veneeded to define a line of text at the bottom of each email: " Please contact Director of IT if your issue wasn't resolved properly". This is pretty straight forward, just went into _issues.rhtml and adjust it. But it makes it system wide, and you need to be a developer or at least have access to source. I was wondering if it would be a good idea to add it as a feature to the admin interface, so users could define stuff like that on per project basis, modify their templates or something, or just add a little message, like a link to a demo page or something, so it is not hard coded into email templates: Thank you Related issues:	atus:	New	Start date:	Start date:

Hi,

As of <u>r858</u>, emails footer can be customized in the admin interface (Admin -> Mail notifications).

For now, this setting can not be overridden at project level.

#2 - 2009-03-23 20:30 - Colan Schwartz

+1 for being able to override the system-wide emission e-mail address in each project.

#3 - 2011-03-24 10:39 - Toshi MARUYAMA

- Category set to Email notifications

#4 - 2011-08-31 21:59 - Fernando Hartmann
