| <b>Description</b><br>Pulled from <a href="http://www.redmine.org/issues/465#note-69">http://www.redmine.org/issues/465#note-69</a><br><br>As discussed over IRC with Eric Davis I'd like to propose an enhancement to this feature:<br><br>Currently it's not possible to get a per-project overview of the available versions. It would be nice if all the projects available versions can be displayed in the project settings (at /projects/xxx/settings/versions). Though it seems the best to me to keep inherited versions not-editable to prevent confusion. Maybe the inherited versions can be displayed in a differentiated way to distinct them from the own project versions? |                                  |
