

Redmine - Defect #4376

Target version combo box corrupted

2009-12-10 13:36 - Rickard Åberg

Status:	Closed	Start date:	2009-12-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

The combo box for setting version info shows the html form-tags instead of correct labels. Se image below.

redmine_target_version.png

I can still set the the target version by right-clicking the bug in the issues list.

The big problem is that whenever you update a bug, for example adding a comment, the target version will be deleted, since the the combo isn't set to the correct one.

I first noticed this after my upgrade to [r3126](#). My last checkout before that was [r3110](#), in which it was working. Right now I use [r3148](#).

I use **ruby 1.8.7**, **mysql 14.14** and **passenger 2.2.5**

History

#1 - 2009-12-10 21:07 - Jean-Philippe Lang

I can not reproduce. Can you give the output of ruby script/about please (see [SubmittingBugs](#))?

#2 - 2009-12-10 21:55 - Rickard Åberg

Right. Here it is:

```
/opt/redmine$ ruby script/about
/usr/lib/ruby/gems/1.8/gems/activerecord-2.3.2/lib/active_record/connection_adapters/abstract/connection_specification.rb:62:in `establish_connection': development database is not configured (ActiveRecord::AdapterNotSpecified)
    from /usr/lib/ruby/gems/1.8/gems/activerecord-2.3.2/lib/active_record/connection_adapters/abstract/connection_specification.rb:55:in `establish_connection'
    from /usr/lib/ruby/gems/1.8/gems/rails-2.3.2/lib/initializer.rb:417:in `initialize_database'
    from /usr/lib/ruby/gems/1.8/gems/rails-2.3.2/lib/initializer.rb:141:in `process'
    from /usr/lib/ruby/gems/1.8/gems/rails-2.3.2/lib/initializer.rb:113:in `send'
    from /usr/lib/ruby/gems/1.8/gems/rails-2.3.2/lib/initializer.rb:113:in `run'
    from /opt/redmine/config/environment.rb:20
    from /usr/local/lib/site_ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require'
    from /usr/local/lib/site_ruby/1.8/rubygems/custom_require.rb:31:in `require'
    from /usr/lib/ruby/gems/1.8/gems/rails-2.3.2/lib/commands/about.rb:1
    from /usr/local/lib/site_ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require'
    from /usr/local/lib/site_ruby/1.8/rubygems/custom_require.rb:31:in `require'
    from script/about:4
```

This doesn't look right of course. It looks the same when I do it in backup folders from older installations. Could something have happened with the database setup during upgrade then? I have per-day snapshots of the database in my backup as well if you would like me to check something.

#3 - 2009-12-11 00:04 - Felix Schäfer

Rickard, if you have a look at the first line of the output, it says amongst other stuff:

```
development database is not configured
```

You'll have to prepend the command with `RAILS_ENV="production"` if you only have a production database configured.

JPL, maybe that's worth mentioning on [SubmittingBugs](#).

#4 - 2009-12-11 00:16 - Rickard Åberg

Should have figured as much. I only have the production database. I noticed the message but thought I had it working before without the variable set.

```
/opt/redmine# RAILS_ENV="production" ruby script/about
About your application's environment
Ruby version          1.8.7 (i486-linux)
RubyGems version      1.3.5
Rack version          1.0 bundled
Rails version         2.3.2
Active Record version 2.3.2
Action Pack version   2.3.2
Active Resource version 2.3.2
Action Mailer version 2.3.2
Active Support version 2.3.2
Application root      /opt/redmine
Environment           production
Database adapter      mysql
Database schema version 20091205124427
```

```
About your Redmine plugins
Redmine Graphs plugin 0.1.0
Embedded              0.0.1
```

#5 - 2009-12-11 15:04 - Jean-Philippe Lang

- *Status changed from New to Closed*

- *Resolution set to Invalid*

It looks like you changed the required Rails version.
Current trunk requires Rails 2.3.4. You're running 2.3.2.
Fix it and it will work.

#6 - 2009-12-11 16:13 - Rickard Åberg

Thank you. I upgraded my rails installation and it's working. Sorry about your time spent.
