Category:	Estimated time: 0.00 hour
Target version:	
Resolution: Wont fix	

Description

Be able to use the new fields such as time estimate(hours) or maybe even CUSTOM FIELDS to CREATE CUSTOM REPORTS. Say maybe do a list of WorkLoadbyUser:

```
select
  Issues.Assignedtouser,
  sum(timeestimate) as WorkLoad
from Issues
  where Issues.StatusCode = 'Open'
group by Issues.AssignedtoUser
```

maybe have an opensource CHART GRAPHING module so you can pass lets say X axis to "assignedtouser" and y-axis be sum(timeestimate)per that user..... well even a simple LIST will do but i think there's nice free charting modules out there which might be cool to have. The MAIN thing though maybe would be ability to create your OWN custom QUERY/REPORT....then you could do like WorkLoadbyUser per this project or WorkLoadbyUser per ALL Projects, WorkLoad by user within these DATES/Timeframe.....etc.....

- Status changed from New to Closed

- Resolution set to Wont fix

Request is too vague.
