<b>Description</b>			
<p>On <a href="#">HowTo translate Redmine in your own language</a> it suggests that the translations are in "The main lang file, located in /config/locales (or /lang before <a href="#">r2493</a>)".</p> <p>I've just checked out the 0.8.7 tag, which tells me I've "Checked out revision 3175."</p> <p>The version I've checked out still has lang/ and has no config/locales?</p>

This is the new location in **trunk**.  
In the 0.8-stable branch and 0.8.x releases, the files are still in /lang.
