

Redmine - Feature #449

Keyboard shortcuts

2007-10-04 11:59 - Motohiro Takayama

Description			
It would be so convinient and productive if redMine supports keyboard shortcuts like Trac or some nifty web apps. For example, press Ctrl+R to preview, Ctrl+S to submit, Ctrl+/ to enter search text, ...			
To support above, we would only need to add "accesskey" attribute to elements (like input, a).			
Thanks,

Associated revisions

Revision 804 - 2007-10-05 20:05 - Jean-Philippe Lang

Added some accesskeys:

- e => edit
- r => preview
- f => quick search
- 4 => search

History

#1 - 2007-10-05 14:07 - Jean-Philippe Lang

Added the following accesskeys in [r804](#):

- e => edit
- r => preview
- f => quick search
- 4 => search

Reopen this request if you have any other proposal.

- Status changed from Closed to Reopened

It would be useful to write in the "title" attribute of every "a" tag with an accesskey a description of the keyboard shortcut, for instance: "Bold (Ctrl+B)".

CTRL+Alt+P => go to projet

In Issue edit:

Ctrl+Alt+S => Focus on Status

Ctrl+Alt+A => Choose file to attach popup (if is possible)

In "Notes" area:

Ctrl+P => pre

Less important:
Ctrl+B => Bold
Ctrl+I => Italic
Ctrl+U => Underline

Up!

Today every modern platforms support hotkeys... All except favorite Redmine.

#5 - 2014-05-08 01:48 - Szabolcs Szasz

And, generally, for editing/updating stuff:

Ctrl+Enter => Submit

I have implemented some shortcuts in [Redmine Shortcuts Plugin](#).

#15 - 2020-09-04 21:26 - Martin von Wittich

Our helpdesk [Zammad](#) has [hotkeys](#) for copying the ticket ID along with URL and title which I find extremely useful:

Ctrl+Shift+. copies only the ticket ID ([#449](#))

Ctrl+Shift+.. copies the ticket ID and title ([#449](#): Redmine: Keyboard shortcuts)

Ctrl+Shift+... copies the ticket ID, title and URL (<https://www.redmine.org/issues/449> Redmine: Keyboard shortcuts)

We probably send up to a hundred Redmine ticket links in our company chat every day; a way to easily include the project and ticket title seems extremely useful to me.

#16 - 2025-06-17 11:09 - Anthony Loiseau

Indeed, copying a clickable "#number" (or "Task [#34892](#)" don't care) hypertext from a very direct button or from a shortcut would be so useful. Is there a plugin implementing this meanwhile?
