Redmine - Defect #4490

Repository—>View   show disordered with GBK(Chinese) code.

2009-12-27 14:54 - Lei Wang

Status:	Closed		**Start date:**	2009-12-27
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	0.8.7

Description

Here are some display problems, on the Chinese code.
Shown as the image "GBKcode.png".
The file ("testcode3.txt") is GBK code, has been commited with TSVN. When I view the code of this file on Redmine's Repository,it's Disordered.
This problem has been troubled me two weeks!

I learn Trac and Redmine for 3 weeks, install it step by step with the packet which their needs. AND I was so shocked by their strong for the great idear that all of them can connect with SVN. Redmine is more powered then Trac for the User-friendly degree, but the Chinese CODE.
So I urge you for help!

I'm sorry I forgot to select the target version, the target version is Redmine 0.87.
It also have the same problem with BitNami install.

I will waiting for your message.

Have you tried to enter an appropriate value in *Administration -> Settings -> Repositories -> Repositories encodings* (eg. GBK) ?

Philippe,thank you for your message. And with your hint I just remembered, I didn't make sure the UTF-8code of the file before I commited it to SVN. I think I must make two things:

1. make sure the name of the file is EN.
2. make sure the file is UTF-8 code.
3. And enter an appropriate value in _Administration -> Settings -> Repositories -> Repositories encodings for UTF-8

I tried again and again, but the GBK is not be supported will. My English is very poor, but you also helped me.
thanks !

#5 - 2009-12-29 14:23 - Jean-Philippe Lang

- Category set to SCM

#6 - 2009-12-30 00:38 - Eric Davis

- Priority changed from Urgent to Normal

- Affected version (unused) set to 0.8.7

- Affected version set to 0.8.7

#7 - 2011-02-05 06:42 - Toshi MARUYAMA

- File test.hg added

- File testcode3.txt.png added

- File TortoiseHg-about.png added

- File hgtk-log.png added

- File redmine-annotate.png added

- File redmine-diff.png added

- File redmine-setting.png added

- Status changed from New to Closed

- Resolution set to Invalid

Line 1 is "□□□□□□□□□GBK□□□□□□□□□　□□□□redmine□□□□□changset□□□□□□□□".
Line 6 is "5□□□□□□□□".

This is correct behavior.

I attach TorotiseHg and Redmine images on my Fedora 13.
"test.hg" is Mercurial repository bundle.

```
$ LANG=zh_CN.GBK hgtk log
```
