Resolution:	
Description	
<p>Hello Redmine developers</p> <p>In "Register" and "Administration"->"Users"->"New user", there is only fixed order to input Firstname and Lastname.</p> <p>I am Japanese, and my name is Seiji KOMATSU, which is written in the English order, but usually write my name as KOMATSU Seiji in the Eastern order.</p> <p>People that usually uses the Eastern order is China, Korea, Japanese and Vietnam. see the 2nd paragraph of "Family name" of http://en.wikipedia.org/wiki/Family_name</p> <p>So, the current Redmine's user interface is not user-friendly for people which uses the Eastern order.</p> <p>I wish it would be able to change the order with each languages.</p>	

History

I'm new to Redmine and also the one feeling inconvenience about this.
I experienced this kind of issue on using Scarab before.
I feel it is enough to hold single 'name' field instead of seperatng into two part because Redmine already has short name like 'gotoh'.
