Resolution:	Invalid		

Description

Hi.

I'm not entirely sure if this is a problem in redmine and if it's already solved (It's a bit hard to search for). Nonetheless. We recently experienced that redmine ldap auth. failed, after we changed username/password to the ldap service. It turns out that in the file app/models/auth_source_ldap.rb the following line should be changed:

```
options.merge!(:auth => { :method => :simple, :username => ldap_user, :password => ldap_password }
) unless ldap_user.blank? && ldap_password.blank?
```

into:

```
options.merge!( :method => :simple, :username => ldap_user, :password => ldap_password ) unless ld
ap_user.blank? && ldap_password.blank?
```

I'm guessing that the api for net/ldap changed somewhere.

Hope this helps somebody.

History

- #1 - 2010-07-09 16:01 - Felix Schäfer
- Status changed from New to Closed
 - Resolution set to Invalid

As far as I can see in the [Net::LDAP API](#) the format is correct.
