Description

Redmine needs to be able to turn trackers on and off per project. Some projects may want Bugs, but some may be support only where Support is the only one you want. Others could be administrative and need only one called Tasks, etc.

History

#1 - 2007-11-06 15:08 - Jesse Rhoads

Agreed. This will help flexibility in naming trackers. For
code management projects makes no sense to have trackers talking
about progress of contracts, service calls, etc.

#2 - 2007-11-20 04:23 - iGor kMeta

+1 I think it will be useful feature.

#3 - 2007-11-20 04:34 - Nikolay Solakov

+1 from me too.

#4 - 2007-11-20 15:32 - Jean-Philippe Lang

Done in r920.
Trackers can now be selected on project settings.
Note that if a tracker is unselected for a given project, existing
issues assigned to this tracker are not removed. They will still
appear on the issue list.

#5 - 2007-11-26 02:55 - Nikolay Solakov

Hi,
On Issues page, when I pick Tracker filter, the trackers are
not filtered by the current project.

Thanks,
Nikolay

#6 - 2007-11-26 13:35 - Jean-Philippe Lang

Yes, I didn't want to remove unused trackers from the filter
list because:
- there may be existing issues that are assigned to them and
it can be usefull to list them
- subprojects may use these trackers (and the issue list let
you show the subprojects issues)

But I'm open to any suggestion. What do you think ?

#7 - 2007-11-27 02:26 - Nikolay Solakov

Well, maybe:
- when I unselect a tracker from project, the tracker seems
to be of no use any more for that project
- when unselecting a tracker from the project settings, there
should be a check if issues assigned to this tracker exist in
the project
- if so, Redmine should not allow this. The user would have
to manually move the issues to another tracker.

This is my understanding of the issue :)

P.S.: Or, you can implement the two ways and put a global setting
for Allowing existing issues assigned to tracker when unselecting
it.

Regards,
Nikolay
