Please rename the issue:  
Allow to use one field in filters multiple times  
I don't have permission for that

I think it's more common issue and can be resolved in another way.

Need to allow to filter one field several times.

For example:  
filtering field "date" type

Now possible values are:

is less than  
is more than  
in  
today  
this week  
less than days ago  
more than days ago  
days ago

It's not easy.  
more easy values are:

is less than  
is more than  
less than days ago  
more than days ago

But allow to filter this field **two** times.  
For example to get "today" variant i need two filters:

less than days ago = 0  
more than days ago = 0

to get "this week" field i need two filters:

less than days ago = 0  
more than days ago = 7

Of course it allow to find issues with two words in the subject: for example date & filter

**I can write patch if you are agree to insert this feature in the redmine**

**#3 - 2011-11-21 06:17 - Maxim Nikolaevich**

i tried last trunk and think date field become more complexity. It's bad, but it's your way. Ok, but the part of this issue still need to be resolved so it can be renamed to "Allow to filter several words in various order and placement in subject."

**#4 - 2011-11-21 06:19 - Maxim Nikolaevich**

- *Status changed from New to Resolved*

since renaming issue to "Allow to filter several words in various order and placement in subject." it can be marked as duplicate of [#1140](#)
