

Redmine - Feature #4584

Require a Target Version and Category and provide a default version.

2010-01-14 15:50 - Steve Overton

Target version:			
Resolution:	Fixed		
Description Currently, there is no support to require a target version and category to be entered on an issue. For all situations or projects this is not necessary but in our use and I assume others, these fields are required and there is no way to make them required. It would be nice to have a project setting to require one or both of these fields. It would also be a nice feature to provide a default version when a new issue is created. This would have to be maintained on the project version.

History

#1 - 2010-11-15 22:46 - Steve Overton

+1 I have requests for this functionality.

#2 - 2011-03-10 15:10 - Brian Underwood

+1 as well. We require people (operationally) to enter a version for bugs (not for features), but I don't see a way to require this in Redmine

#3 - 2012-11-29 07:46 - Steven Wong

+1

#4 - 2013-01-22 10:24 - Nan Cao

+1, to set Target version to Required and Providing a default value make it convenient and standard to create a issue.

#5 - 2013-03-25 16:59 - Dipan Mehta

Requiring a target version and category is now achieved (at least post 2.0.x). Setting the Default Target value for new issue will be available under [#1828](#).

Add related/duplicate [#1828](#).

#6 - 2016-12-24 03:10 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

Closing this issue because current versions of Redmine have these features.

- Making target version and category mandatory: [#703](#) (Redmine 2.1.0)
- Default target version: [#1828](#) (Redmine 3.2.0)
