

Redmine - Defect #4591

Atom Key does not show non-public projects

2010-01-15 08:59 - Mario Mueller

Status:	Closed	Start date:	2010-01-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Feeds	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Cant reproduce		
Description			
<p>Hi folks,</p> <p>I'm working on a github fork of iRedmine and started to port the code to the newer atom API of Redmine. In my understanding, the "key" GET param should grant access to the non-public projects I'm related to. It does not seem to make any difference if I add the "key" param or not. Am I misunderstanding this feature?</p> <p>I'm acutally running this version: Redmine 0.9.0.devel.3313 (MySQL)</p>			

History

#1 - 2010-01-16 11:48 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Cant reproduce

No, this is the expected behaviour.
For example, if you go to <http://redmine/activity.atom?key=youratomkey>, you will see the activity of private projects you belong to. Tested OK 1 minute ago with latest trunk.
