Description

I would like to suggest to have some kind of voting system for the features to be implemented in version 1 of Redmine.
When I look in the forum I see 882 issues form where many has the "+1" which apparently should mean "I want this too" But this is quite random and does not give an accurate representation of what the users would like to see.

I respect Jean Philippes sole right to decide what should or should not be implemented, but there is a tremendous amount of brainpower in the forums that have brilliant ideas of that a version one should be. Why don´t utilize this in a formalized matter.
I noticed there was a "Vote plugin" would it be an idea to use this, to shread light of what the users deem as killer features?

Cheers,
Lars
