Description

Hi,

I have been trying to install the Schedules plug-in into my Redmine. I have followed the steps to install the plugins but the rake fails when i try to migrate the database.

P.S. : The version of redmine that i am using is 0.8.x , I do not remember the exact version, I am running the redmine on locally.

The following is the Trace,

(in /home/rahul/redmine-0.8)

```
• Invoke db:migrate_plugins (first_time)
• Invoke environment (first_time)
• Execute environment
rake aborted!

History

#1 - 2010-06-10 08:45 - Jean-Baptiste Barth

- Priority changed from High to Normal

Can you read [SubmittingBugs](#) and provide a complete report, with exact versions and a way to reproduce ?

#2 - 2010-06-10 08:54 - Felix Schäfer

- Status changed from New to Closed

That seems to have been some error with encodings and gloc, which is moot now as redmine doesn't use gloc anymore.

Closing as outdated.
