<b>Description</b>			
<p>I am install the embedded plugin and I am very happy with it. Congratulation to the dev team.</p> <p>I just have one remark. Currently , the path to the root folder is defined for all the redmine installation. It would be better to have it per project. As an example, I have two projects with their own Doxygen folders. With the current version of the plugin, it is not possible to define a different paths to the Doxygen documents.</p>

##### #3 - 2013-05-02 03:15 - Jean-Baptiste Barth

- Category changed from Plugin API to Core Plugins

- Status changed from New to Closed

Closing this issue as it is very old + outdated. No plan to work on this plugin as far as I know, it was just an example.
