Target version:	1.0.0 (RC)			
Resolution:	Fixed			

Description

We have a couple of forum threads with a lot of answers (> 150). It takes a while until those threads are being loaded. I measured the time for loading one of them (730kB HTML content):

- 26.3 seconds to get the response from the server
- 2.6 seconds to render (in Firefox)

The HTTP header tells me something about X-Runtime of 78ms - so the (Mongrel) server seems not to be the problem ...

A paging feature within the thread would reduce this time a lot
