#### History

## #1 - 2011-09-20 12:01 - Laurent Dairaine

It could be also useful to get fields appearing in the ticket depending on the ticket state.

## #2 - 2012-10-12 10:13 - Anton Nepomnyaschih

This is duplicate of <u>#11329</u>.

#### #3 - 2012-11-22 11:29 - Daniel Felix

- Category set to Issues workflow

Well, this one seems to be solved by <u>#8050</u> and <u>#12005</u>.

You can define some workflow, where some role has write or just read rights, even for custome fields (<u>#8050</u>). Additionally, you can define if these custom field is visible or just hidden (<u>#12005</u>).

Is this an implementation, which fits your needs? If see, please give feedback and this Ticket could be closed.
