Resolution:	Fixed		**Affected version:**	0.9.1

Description

When showing a large item list (in **Overall Activity**) the page becomes blank after some number of items on Firefox v3.5.7, but it's OK on IE v8 (I don't know the status with other browser versions; I'll provide them if possible).

I have following plug-ins installed, but I don't think it has anything to do with them.

Associated revisions

Revision 3376 - 2010-02-06 15:05 - Jean-Philippe Lang

Removes overflow:auto on #content which broke the fix in r2118 (#4724).
Autoscroll divs are added around large tables.

It's actually not the entire page goes blank; it's the listing frame becomes **black** beyond some number of items.

It looks like r3177 reintroduced this problem which was fixed in r2118.
