<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	0.9.0
<b>Resolution:</b>	Invalid		
<b>Description</b>			
<p>1. We have a custom field 'Sprint' 2. It is shown as available for grouping in the issues list. 3. However if we do that Redmine crashes and has to be restarted.</p> <p> Original report from my developer:</p> <p>I have found a bug of the latest version of Redmine. I think in original redmine, there is no column for Sprint. Sprint is our "custom column" or it called "custom_fields ", am I right? so when I group by Sprint, and it shows:</p> <pre>Internal error  An error occurred on the page you were trying to access. If you continue to experience problems please contact your redMine administrator for assistance.</pre> <p>it seems group by can NOT apply to custom_fields. and it will cause error.</p>
