Category:	SCM		**Estimated time:**	0.00 hour
Target version:	0.9.3			
Resolution:	Fixed		**Affected version:**	0.9.1

Description

Hi guys, it seems that I have problem.
When I start this command:

```
$ ruby script/runner "Repository.fetch_changesets" -e production
```

I got such error messages:

```
svn: Server sent unexpected return value (403 Forbidden) in response to OPTIONS request for 'https
://svn.some-projects.com/some-project/qwe/asd'
svn: Server sent unexpected return value (403 Forbidden) in response to OPTIONS request for 'https
://svn.some-projects.com/some-project/CustomChannels'
```

This repositories was disabled but projects which contained this repositories was already in archive.
This problem was solved only when I unarchived those projects and delete inactive repositories.

It seems to me that when project in archive Redmine should not access to their repositories.

```
Redmine 0.9.1
svn, version 1.6.5
```

Associated revisions

Revision 3402 - 2010-02-09 19:42 - Jean-Philippe Lang

Fixed: Repository.fetch_changesets tries to fetch changesets for archived projects (#4782).
