

Redmine - Feature #4806

Filter the issue list by issue ids

2010-02-11 15:55 - Andrea Salicetti

Status:	Closed	Start date:	2010-02-11
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues filter	Estimated time:	0.00 hour
Target version:	3.3.0		
Resolution:	Fixed		
Description			
It should be possible to filter by issue id (the # column). Now (Redmine 0.9.2-devel) it is not.

Hello Jean-Philippe,

The search by number allows to find just one issue. How can we search or filter for multiple issue Ids'?
A typical scenario is "I've got a list of issue numbers, and want a list of these issues, with links etc."
There's no filter for Issue Id on the Issues page, and entering multiple issue Ids into the Search does not bring the issues with the entered numbers.
Either an empty resultset, or a list of issues referring to these issues.
Example: trying to quickly get a list composed of this issue and the possibly related #6180 and #3627 :
<http://www.redmine.org/search/index/redmine?q=4806+6180+3627&scope=&issues=1&submit=Submit>

Expected:

1. entering multiple numbers in Search with **All words** unchecked searches also in issue ids; issues with exactly matching ids are returned on top of the list (i.e., before any "referring" issues). Maybe a separate checkbox "Search issue ids"

2. a filter on the Issues page with appropriate operators (equals, not equals, is in list, is not in list - do I miss anything?). And a space- or comma-separated list of issue ids as the input field.

Let's elaborate this further if needed...Drop me a note.

+1, but modified...

Recently, I just ran across a situation where I needed to close a large number of errantly filed tickets. They all had sequential numbers, so I thought it would be easy to bulk-close them...

issue >= X && issue <= Y

The other comments do not mention such range/bounds operations, which... AFAICS, would be the primary motivator for adding this as a search criteria (esp. if a site was hit by a spambot, or something: X<issue

#7 - 2016-03-29 12:27 - Andreas Witt

From my point of view it would be usefull to filter by #, especally for documentation.

For testing I have to generate a list of fixed bugs for my testing team. When the test is done I need the list of all fixed items with the actualized status. For this purpose a list of items selected by id would be verry helpfull because normaly the status of the ticket has been changed meanwhile.

- Target version set to 3.3.0

- Resolution set to Fixed

Feature added. You can filter on one or multiple (using comma separated ids) issue ids, or by range.

#10 - 2016-05-21 09:07 - Jean-Philippe Lang

- Subject changed from Filter by issue id to Filter the issue list by issue ids

#11 - 2016-06-04 06:25 - Go MAEDA

- Category changed from Search engine to Issues filter

#12 - 2016-08-29 06:59 - Toshi MARUYAMA

- Related to Defect #23596: Filter on issue ID with between/lesser/greater operator does not work added

#13 - 2017-08-02 10:50 - Ivan Tsybanenko

Works fine in Redmine 3.3.3

Like this:

http://redmine.url/projects/project-name/issues?set_filter=1&status_id=*&issue_id=12345,12346,12347
