

## Redmine - Defect #4848

### INSTALL doc: session key must be made before db structure

2010-02-15 12:18 - Henning Sprang

<b>Target version:</b>	0.9.3	<b>Affected version:</b>	
<b>Resolution:</b>	Fixed		
<b>Description</b>			
<p>When trying to run step 4 in the INSTALL doc "rake db:migrate RAILS_ENV="production"</p> <p>I get the mmessage "... A key is required to write a cookie containing the session data. Use config.action_controller.session = { :key =&gt; "_myapp_session", :secret =&gt; "some secret phrase" } in config/environment.rb"</p> <p>Step 5 (running rake config/initializers/session_store.rb ) solves this - but usually people run these steps from top to bottom, so the ordering should be changed :)</p> <p>For the records: I'm working with redmine 0.9.2 here.</p>
