

## Redmine - Feature #4980

### Reference to a commit in a different project

2010-03-03 17:40 - Damien MATHIEU

<b>Status:</b>	New	<b>Start date:</b>	2010-03-03
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
<p>Using git, every commit in the repository has a different hash. The chances to have twice the same hash in two different repositories are quite low.</p> <p>However when we reference a commit (with commit:xxx) in an issue but this commit is not in the project's repository but in an other's, the link isn't made.</p> <p>Perhaps displaying something like (project's name)commit in the link so we would see it's not in the current project but we're going somewhere else ?</p>
