

## Redmine - Feature #5009

### Add an option to set a custom field as unique

<b>Description</b>	
<p>It could be usefull if there is a check button "Is unique" when creating a custom field. So, two issues could not have the same value for a custom field.</p> <p>For example, I created a custom field "Id" witch is equal to the id of an issue but for my customer and I need this custom field unique.</p>

Hi, this is not the same problem as having Auto Number feature.

For instance I need to create Custom Field storing an OrderID (entered manually) and I want it to be unique across all tickets. Is there a way to achieve it?

Still need unique :) amd autoincrement... (converting my old FileMaker Inventory database to Redmine, R.I.P. FileMaker)

##### #6 - 2017-05-15 16:55 - Christopher Maximov

+1 for unique.
