Target version:	
Resolution:	
Description	
\app\views\layouts\base.rhtml	
I got some help with my second image on #header (h1 wasn't the correct size, I needed 100% height and completely right within #header)	
Would it be possible to put this in as it also helps for more configurations in css theming	
Cheers	
code	
<pre><div id="header"> <table width="100%" height="100%" cellpadding=0 cellspacing=0> <tr width=100%> <td id="header_left" width = 75% valign=top> <h1><%= h(Herve Harster ? @project.name : Setting.app_title) ></h1> <div id="main-menu"> < Redmine::MenuManager.allowed_items(:project_menu, User.current, Herve Harster).each do item > < unless item.condition && !item.condition.call(Herve Harster) > <= link_to I(item.name), {item.param => Herve Harster}.merge(item.url) > < end > < end if Herve Harster && !@project.new_record? > </div> </td> <td id="header_right" width = 25> <div id="quick-search"> <% form_tag({:controller => 'search', :action => 'index', :id => Herve Harster}, :method => :get) do > <= link_to I(:label_search), {:controller => 'search', :action => 'index', :id => Herve Harster}, :accesskey => accesskey(:search) >: <= text_field_tag 'q', @question, :size => 20, :class => 'small', :accesskey => accesskey(:quick_search) > < end > <= render :partial => 'layouts/project_selector' if User.current.memberships.any? %> </div> </td> </tr> </table></pre>

Tables shouldn't be used for layout.

I'm pretty sure that your background problem can be solved using css. You can send me a screenshot of your expected header design with your backgrounds, I'll try to send you the corresponding css.

Thanks!

#3 - 2007-11-27 16:14 - Jonathan Hall

File is attached by the way

#4 - 2007-11-27 18:11 - Jean-Philippe Lang

Here is the modified css that do the same with no change to layout.rhtml
